## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 and 10-16 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Kostun (6,427,112) or Akihisa et al (6,155,224). Note Figure 8 of Kostun, which shows first and second resonators (146, 162) and air cleaner (148). Note Figure 14 of Akihisa et al, which shows resonators (107, 110, 109) and air cleaner (100). Both Kostun and Akihisa et al show everything except specifically disclosing the use of a carburetor, and that the devices are employed in four-wheeled vehicles. It would have been obvious, if not inherent, that the devices would employ carburetors, in order to mix the fuel and air going into the combustion chamber, and that the devices would be employed in four-wheeled vehicles, as this is conventional.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 9 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kostun (6,427,112) or Akihisa et al (6,155,224). Kostun and Akihisa et al both show everything except utilizing the device in an off-road vehicle. It would have been obvious to one having ordinary skill in the art to employ the device in an off-road vehicle, in order to reduce the noise generated by the off-road vehicle, as these types of vehicles are conventional and it is well known that they tend to be noisy.

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
